Sci-fi 4X strategy game, it's ok.

If it included a decent story line, I would have played it more.. I guess I know how to use rope now.

So there's that.. There's really, nothing to do. I wish I'd read the reviews or something first, but... I didn't. And I paid 20 EUR for something that's worth maybe... 5.. Bland, bland, bland. Feels like a student project pretending to be a retail game. Do not buy..

Horrible game on PC. Can't even adjust the font size - almost impossible to read any dialogues on my 22 inch screen.

Very much lack of effort to make the game playable in PC.. Very good „Halloween Theme Prison" for The Escapists 2! Really love it! Cool desing,escape ways and animations! :D. I don't know what to feel about this game, but as a game developer who was previously worried about whether or not his game would make it anywhere this game has re-assured me that there's nothing to worry about.. Would of played 45 euro's for this

Graphics-Crap.

Sound-Not so bad.

Story-Still have'nt played better in a fps.

Review checklist by Birb. It's a great game, the one problem is the sound is too loud and you can't change it. For example, like if I wanted to talk to someone in a call or something, the game will be too loud to hear them. Complete and utter garbage. To those of you who somehow are still considering buying this "game" for some unfathomable reason, I have one response.

Don't.. Christian rulers have needed some good chants for a while now, and I love this music pack. It's the first one I have liked enough to write a review *and* buy for a friend.. Very unique experience. Definitely worth a try on a sale.. Could have been a decent little game, but it has too many flaws.

1. You get a starting capital, there is however no way to get more capital.

* I thought I did something wrong, so I restarted the game, which we come at bug number 2

2. After restarting the game, your starting capital stays the same as when you left the first game (you get for example 1000 credits in the first game, you delete the savefile to start a new game with capital at 40, you start the new game with just 40), so the game unplayable, unless you reinstall the game (which I am not going to)

4. So I wanted to quit the game, but the game didn't let me... Ctrl+Alt+Del didn't work, Alt+Tab didnt work, it took forever untill the game finally decided to stop working, because it crashed. It just took forever for the game to realize it crashed.

Save yourself the stress and dissappointment with this "game" - because when I played the first game, I placed certain resource collectors, but there was no income of resources, only for the uranium and power. And now seeing this game is from 2016, I do not believe this game will ever get updated.
